

## **Annex D – Notes on calculating the estimated value of the FPS 2015 pension at retirement**

### **FPS 2015 – estimated pension**

The estimated value of your FPS 2015 benefits is calculated based on the 2015 pension built up to the date of your statement, plus your estimated service from that date to your normal pension age (age 60), multiplied by the 2015 scheme pay, multiplied by  $1/59.7^{\text{th}}$  of your pensionable pay for the scheme year.

The value of this estimate does not include any adjustment for future revaluation under Treasury Revaluation Orders.

The two examples below show how this would be calculated at different dates of joining the scheme.
